

## Rigging and Millwright Services

West Point Industries consolidates mechanical contracting services under the West Point Mechanical Division. Capabilities include:

- Full engineering services
- Project management
- Facilities management
- Fabrication
- Assembly
- Process piping
- Equipment installation

Each of the above services is supported by West Point Industries' 188,000 square foot manufacturing facility and Certified Professional Engineering capabilities. West Point Mechanical welders are AWS certified.

Services are available as needed, or employed in combination to execute full turn-key projects. These include design/build packages incorporating engineering, design, CAD drawings, equipment procurement, project management and start-up. Projects are further enhanced with process control programming and IT integration by West Point Automation.

If needed, West Point Mechanical will complete installation at your location with a field crew experienced in transportation and set-up of large equipment and machinery. We are a certified drug-free workplace with a worker's comp experience rating of .64, and all team members follow strict safety requirements.

*Rely on West Point Mechanical -- YOUR project development resource!*

## Building Construction Services

When facility specifications require customized structural elements, West Point Mechanical is the ideal resource. Our certified engineers will analyze building plans and anticipated utilization, then develop a design plan to optimize your operation's space, process and efficiency within the new construction. The West Point Mechanical team has experience in industries ranging from bulk handling, automotive, tire/rubber and copper wire to manufacturing pulp and paper, batteries, cotton ginning and textiles.

Every project is unique – objectives may include modification or transporting and reinstallation of machinery, customized stairs, catwalks or other fabricated structures, industrial piping, or pneumatic conveying systems.

West Point Mechanical offers expertise as needed in

- Detailed design and fabrication of miscellaneous metals
  - AWS certified welders
  - Surface preparation
- Manufacturing components
  - Turn-key installation
  - Field services
- Certified engineering and drafting services
  - Design blueprints

*From concept through completion West Point Mechanical is the team to trust!*
